

# Feeling motion – Even in times of crisis

## Dear customer

How do you cope with this never-before-seen state of emergency? Are you looking for a way to overhaul your gearboxes to be ready for your business after the state of emergency?

We currently live in a situation where technicians are not allowed to visit the customer. This also affects Kissling AG. The spare parts business is less affected, because spare parts can be delivered relatively quickly by a forwarder also in this state of emergency. Unfortunately, technicians who exchange spare parts are not.

Therefore, Kissling AG wants to help you. Our technicians overhaul all types of gear units „in house“, no matter which manufacturer, and bring them back to a nearly new condition. Our experience over decades in gear unit construction makes us the right partner for you.

## We offer you an all-round package in these difficult times:

Transport

Sandblasting

Assessment of the components

Replacing bearings and seals

Inspection of shafts and gearing parts

Painting of the housing

Assembly report

Did we get your attention?

**Discuss the further procedure with one of our technical sales representatives today. You can reach us from 8.00 am to 4.30 pm on +41 44 308 97 97, or from 4.30 pm to 10 pm on +41 79 279 41 17.**

We wish you and your family all the best.

Kissling AG
